### **Inspirational Quote:**

**Joke:** What do you call a Frenchman in sandals?

**Interesting Fact:** Dentistry is the oldest profession in the world - Dentistry goes all way back to when humans first had teeth...well not quite that long. However, one study found [evidence of teeth being drilled](#) in skulls that dates from 7,500 to 9,000 years ago. The holes were likely made using a prehistoric bow-drill. Could that be the work of the first dentist? Other [biting research](#) conducted by the University of Bologna, Italy on a 14,000-year-old skull found that "one rotten tooth in the jaw had been deliberately scoured and scraped with a tool," [according to the BBC](#). That makes dentistry one of the oldest recorded professions and is definitely a reason to smile.
