Inspirational Quote:

Joke: Did you hear about the actor who fell through the floorboards?

Interesting Fact: Glaciers and ice sheets hold about 69 percent of the world's freshwater. Just over 96% of the total amount of the world's water is held in its oceans, according to [*Water in Crisis: A Guide to the World's Fresh Water Resources*](#) via the United States Geological Survey (USGS). However, that's primarily saltwater. To find the bulk of the world's freshwater you need to trek to the poles, as 68.7% of it is encased in ice caps, permanent snow, and glaciers.
